11.50 – 12.10 (Chile) 15.50 – 16.10 (CET)	Q&A to all agencies and closing remarks

EUREKA NETWORK

Established in 1985, Eureka is a network that includes 47 countries who share the same goals and provide national funding to organizations who apply through our programs.

GOAL

Increasing the productivity and excellence of industries and supporting lasting employment and national economic growth by encouraging international collaboration between companies, research organizations and universities.

BENEFITS

- Provide access to public funding
- Drive international collaboration
- Boost expansion into new markets
- Offer personalized advice

 Albania	 Denmark	 Luxembourg	 Slovenia
 Argentina	 Estonia	 Malta	 South Africa
 Austria	 Finland	 Monaco	 South Korea
 Belgium (Brussels)	 France	 Montenegro	 Spain
 Belgium (Flanders)	 Germany	 North Macedonia	 Sweden
 Belgium (Wallonia)	 Greece	 Norway	 Switzerland
 Bosnia and Herzegovina	 Hungary	 Poland	 The Netherlands
 Bulgaria	 Iceland	 Portugal	 Türkiye
 Canada	 Ireland	 Romania	 Ukraine
 Chile	 Israel	 San Marino	 United Kingdom
 Croatia	 Italy	 Serbia	
 Cyprus	 Latvia	 Singapore	
 Czech Republic	 Lithuania	 Slovakia	

CLUSTERS

It facilitates funding for industry-led mid- to long-term R&D projects that can include organizations along a whole value chain.

NETWORK PROJECTS

Bottom-up cooperation program, where national funding bodies cooperate and launch bilateral and multilateral calls for projects

INVESTMENT READINESS

It supports collaboration between up to 500 highly innovative SMEs and investors or large companies.

INNOWIDE

It funds innovative SMEs to assess the viability of commercial or research ambitions for internationalization in a target country

EUROSTAR

Funding instrument that supports innovative SMEs and project partners by funding international collaborative R&D and innovation projects.

**EUREKA
NETWORK PROJECTS**

I.

WHAT IS IT?

Flexible funding program for international R&D projects, where national funding bodies cooperate and launch bilateral and multilateral calls for projects.

II.

GOAL

It eases collaboration between organizations in Eureka countries offering you the freedom to design your project proposal and build your ideal consortium.

III.

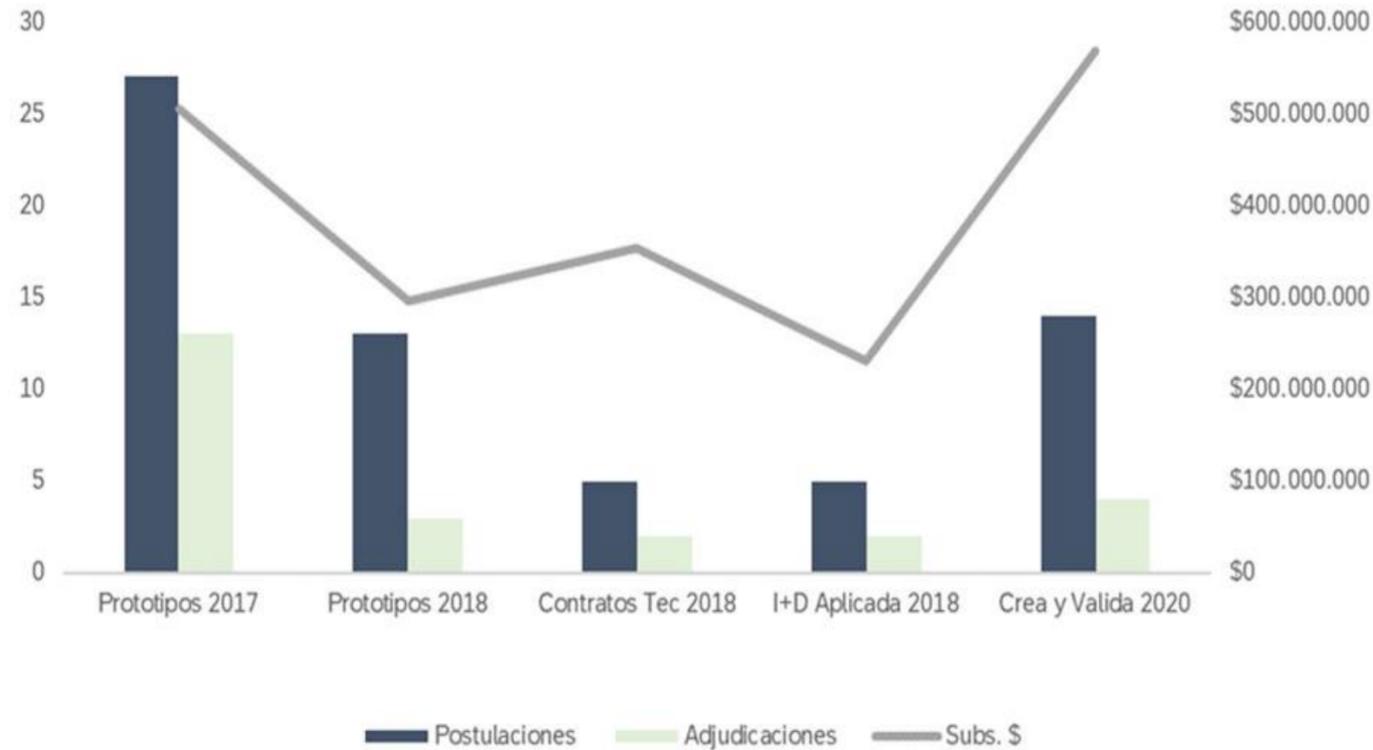

PROJECT

1. Your project idea must represent cooperation in the form of a specific project.
2. The project must be directed at researching or developing a product, process or service.
3. The project must have a civilian purpose.
4. Your consortium must include at least two independent legal entities from at least two Eureka countries.

CALL 2022 Eureka Network Projects

CORFO together with FFG from Austria, VLAIO, SPW and Innoviris from Belgium, Bpifrance from France and CDTI from Spain, launched a multilateral call of Network Projects for collaborative R&D+i projects led by private companies.

CALL 2023-2024 NETWORK PROJECTS

Multilateral call between the agencies of **Belgium, Chile, France and Spain.**

This call supports R&D and innovation projects focused on **Green Technologies in the following areas:**

- Energy
- Water
- Farming Forestry
- Transport
- Circular Economy
- Building Construction
- Pollution

Call for innovative projects between Belgium (Flanders), Chile, France and Spain

FROM NOVEMBER 27, 2023 AT 21:00 ST. PIERRE & MIQUELON TIME
TO APRIL 10, 2024 AT 13:00 ST. PIERRE & MIQUELON TIME
THE CALL CLOSES ON 10 APRIL 2024

The national funding bodies from Belgium (Flanders), Chile, France, and Spain have allocated funding for organisations collaborating on international R&D projects that target green technologies such as energy, water, farming forestry, pollution waste, transportation, circular economy and building construction.

You can submit your R&D project application for this call for Eureka Network projects between 28 November 2023 and 10 April 2024. Your project consortium must include at least two firms from two different countries participating in this call for projects.

Research institutes/universities and other organisations are welcome to participate in collaboration with companies (according to each country's funding regulations).

A photograph showing a person standing in a futuristic, illuminated environment. The scene is dominated by blue and purple light beams and patterns, creating a high-tech, digital atmosphere. The person is seen from behind, looking towards a large, glowing structure.

**FOCUS OF THIS CALL
GREEN TECHNOLOGIES**

GREEN TECHNOLOGIES

In general, green technologies are considered those that “protect the environment, are less polluting, use all resources more sustainably, recycle more of their wastes and products, and handle residual waste in a more acceptable manner than the technologies for which they were substitutes”*

Decarbonization

Adaptation and
Resilience to
Climate Change

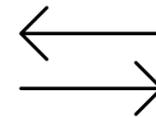

GREEN TECHNOLOGIES EXAMPLES

Energy

- Renewable energy; energy efficiency; energy waste
- Emerging industries such as green hydrogen, lithium, and electromobility

Transportation

- Green Logistics Initiatives
- Electric and Hydrogen-Powered Trucks
- Logistics Optimization Platform
- Autonomous Vehicles Deployment

Farming

Forestry

- Adoption of organic farming methods and reduced use of chemical inputs
- Efficient use of resources like water, fertilizers, and pesticides
- Utilization of biotechnology and genetic engineering to enhance crop resilience
- Implementation of early warning systems and firebreaks

Circular Economy

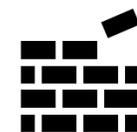

- Product Life Extension
- Implementation of reusable and refillable packaging solutions to reduce single-use packaging waste
- Circular Design in Electronics
- Electronic Waste Recycling
- Promotion of remanufacturing processes for products like automotive parts or office equipment

Water

- Smart Water Metering System
- Utilization of reverse osmosis, distillation, or other advanced purification technologies
- Leak Detection and Prevention System

Construction

- Utilization of advanced insulation materials to enhance building energy efficiency
- Smart Building Automation Systems
- Waste Heat Recovery Systems

Pollution

- Water Pollution Cleanup
- Implementation of cleaner technologies, emission controls, and stricter environmental regulations
- Remediation of soil and groundwater contamination to make the site suitable for new uses.

VLAIO BELGIUM

Flanders

State of the Art

Support for French SMEs : DIAG PTI

**PARTENARIAT
TECHNOLOGIQUE
INTERNATIONAL**

The Diag PTI International Technological Partnership offers financial assistance to French companies looking to set up international projects.

This tool is available to fund **an individual support** provided from an expert consultant on any of the aspects of the project management process.

Bpifrance covers 50% of the cost of the service.

Assisting in the search for a partner(s)

Helping to negotiate the consortium agreement

Supporting the organisation of R&D projects

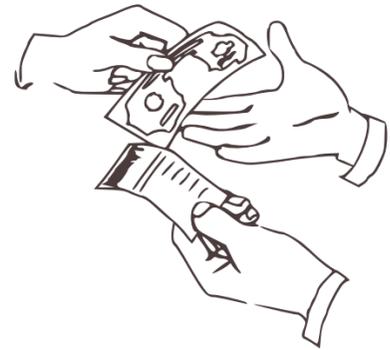

Drafting the application file

Find out more here!

HOW DOES IT WORK?

MAXIMUM AMOUNT OF THE SERVICE

- The consulting service is limited to €25,000 excluding tax if the beneficiary company is the consortium leader, and €5,000 excluding tax if it is not the case.
- Bpifrance finances 50% of the cost up to €15,000 including tax, this aid being paid to the consultant at the end of his service.

TYPE OF CONTRACTING

- Bpifrance signs a contract with the company applying for aid and the expert consultant
- It is the French company's service provider who is paid

DIAG PTI PROCESS

HOW TO APPLY FOR A DIAG PTI

STAGE 1. FIND AN EXPERT

Your choice or referenced by us

STAGE 2. SUBMIT YOUR APPLICATION

After obtaining a quote (non-signed), submit your application.

The platform to submit your application!

<http://diag-tech-international.bpifrance.fr/>

STAGE 3. GET STARTED!

Bpifrance reviews your application in 1 to 2 weeks, and as soon as it is approved, you can proceed with the service
